

Checchi & Magli

Made in Italy with Passion

TRIUM TRIUM TRIUM

TRIUM/8

Completely adjustable transplanter – the most efficient plug transplanter on the market.

Many features include - Sets plant straight in the ground, consistent plant spacing and planting depth, and completely adjustable to adapt to your farm soil conditions. Semi-automatic for tapered and pyramid-shaped plug plants up to 1.2" in diameter – planting units are ground driven.

Suitable for all plug plants – even with very developed leaves (ie. tobacco, tomato, cabbage, etc...).

The transplant units are independent and modular. The 10-cup carousel (standard) ensures high productivity and comfort for the operator.

Estimated production speed: 4500-5000 plants/hour per row (6000-7000 with 12 cup carousel).

OPTIONAL:
Synchronized herbicide/insecticide Box (micro-granulator)
Allows application of a small herbicide dose (adjustable), continuous line or on each individual plant - precise, safe, efficient and ecological

STANDARD: Cup extensions for taller plants;
OPTIONAL: cup reducers for small plug plants

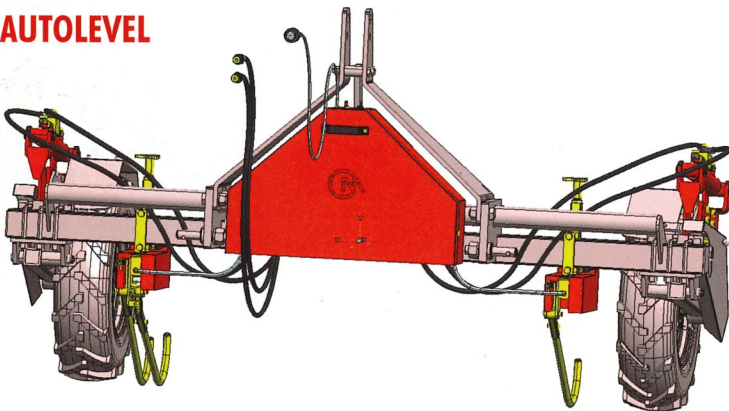

STANDARD:
Metal packing wheels – fully adjustable

OPTIONAL:
Rubber packing wheels for damp and clay-like soils

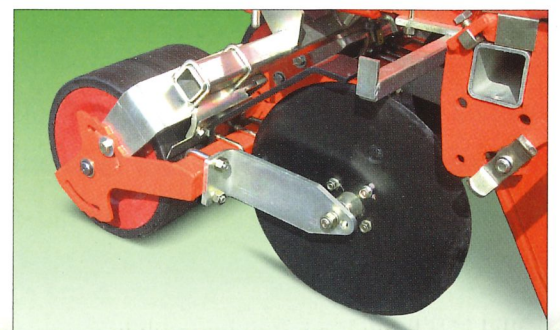

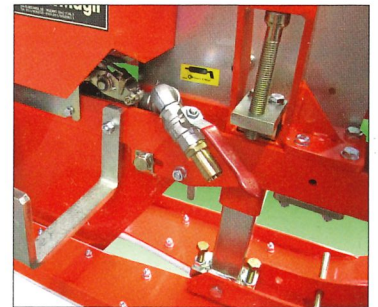

AUTOLEVEL

Automatic height adjustment of the frame; servo-assisted electro-hydraulic control

OPTIONAL:
Water trip – fully adjustable both the quantity (up to 8 oz) and the positioning of the drop

OPTIONAL: Front opening disk to cut through debris

OPTIONAL: ground driven fertilizer application; continuous, adjustable granular flow

OPTIONAL, drip line device

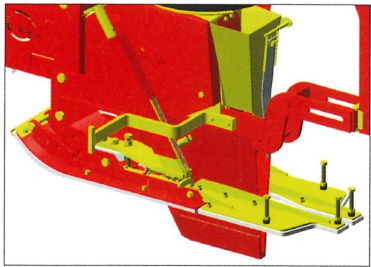

STANDARD Parallelogram ensures constant planting depth

Additional tray storage options

OPTIONAL: soil packing with Skids (instead of packing wheels)

OPTIONAL: Skid, ideal for soft and dry soils in combination with the packing wheels
