Enviromist Vineyard Special

The Enviromist Vineyard Special was developed to offer growers a complete sprayer package on wheels. This eliminates the need to mount the domes on the vehicle and you can tow with any vehicle or mount 3 point on your tractor. It is adjustable from 8 foot to 12 foot rows. The in-the-row domes can be fitted as Spraydome 600 or Undavina 600 with slip-on covers. This modular frame is designed to be used for both configurations and can be converted later. High of frame is easily adjusted with a jack for your operation. The domes have another adjustment from the main frame for berms. Controls are mounted to trailer and a remote cable is long enough for controlling from the vehicle's operators platform. Tow hitch is designed for 2" ball to work in many ground conditions and provides quick transportation to remote vineyard locations. The Vineyard Special is the fastest growing product in our line and many have been used for narrow planted Olive Orchards.
