

GASPARDO

MOD. **ORietta**

MOD. **OLIMPIA**

All-purpose precision vacuum planter for vegetables.

MOD. **ORietta - OLIMPIA**

Our vegetable vacuum planters are the result of the experience GASPARDO has gained in precision planting. Structural functionality and component modularity make this a versatile machine for use in the specialized sector of vegetables and of beetroot. The new **ORietta - OLIMPIA** range of vegetable planters has a substantially updated seeding unit. We have created a new oversize distributor body, where a 22 cm-diameter seed disc is housed, that, with the same forward speed of the tractor, requires a lower rotation speed

of the seed disc and therefore gives high precision in seed distribution. With the new **ORietta - OLIMPIA** planter, it is possible to manage different planting depths with high versatility and simplicity thanks to the application of reversible furrow-opening coulters. The seeding element can be set up in the various models by using the special conversion kits to prepare the most suitable configuration for each specific requirement.

Localisation of the fertiliser on the seed (optional)

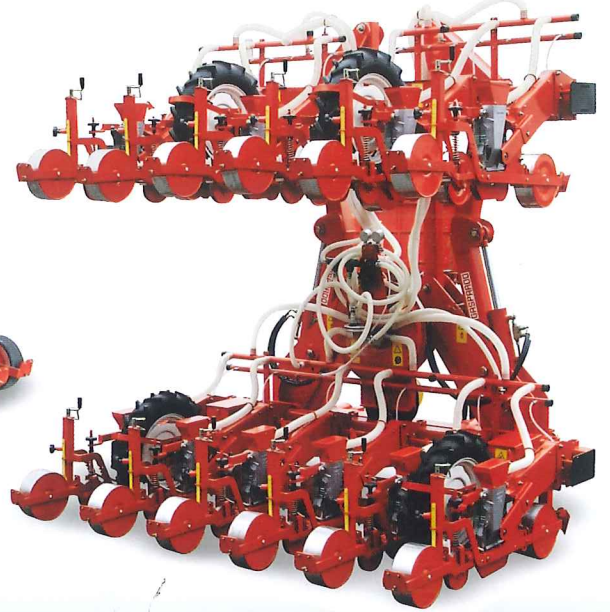

- 1) Flat processing roller
- 2-3) MINIMAX (patented) volumetric distributor for granulate and fertilizes distributors
- 4) Electronic hectare counter
- 5-6) Seed control monitor

MOD. ORIETTA

- 1) Seed distributor
- 2) Shoes
- 3) Pressure adjust. spring
- 4) Unit hooking lever
- 5a) Flexible rubber press wheel
- 5b) Hard rubber press wheel
- 5c) Stainless steel press wheel
- 5d) Cage steel press wheel
- 5e) Rubber "V" press wheel
- 6) Planting depth adjust. lever
- 7) Clod clearer
- 8a) Seed stainless press wheel
- 8b) Seed rubber press wheel
- 9) Seed coverer
- 10) Expelier seeds

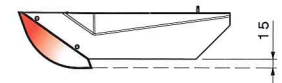

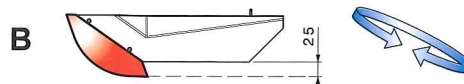

Shallow seeding cutter

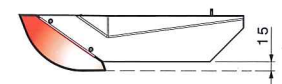

Normal seeding cutter

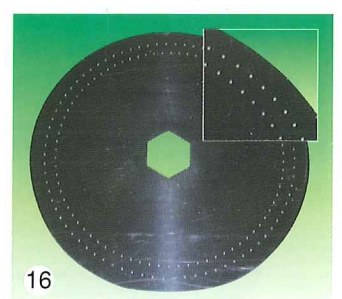

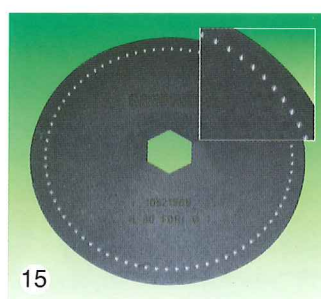

Deep seeding cutter

Normal seeding cutter

- 11) Single row shoes
- 12) Broad seeding shoes (6 cm)
- 13) DR shoes (double row) 5 cm
- 14) DR shoes (double row) 7 cm
- 15) Seed plate for single row and broad seeding
- 16) Seed plate for double row

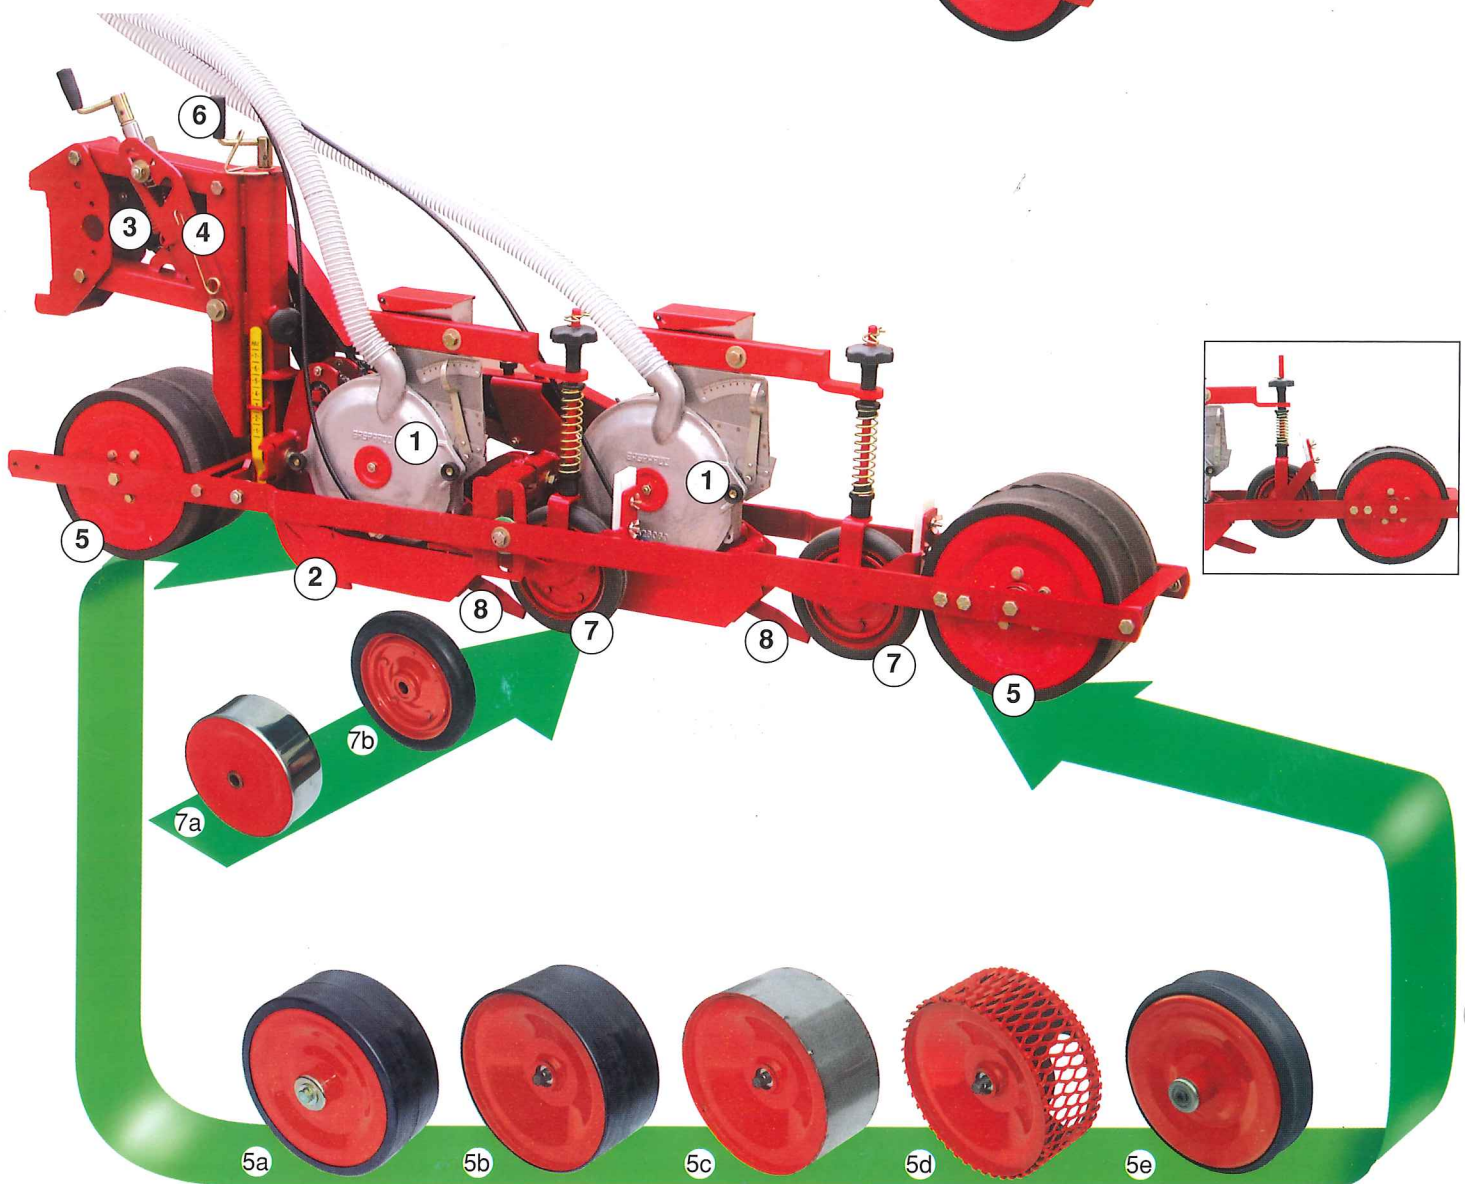

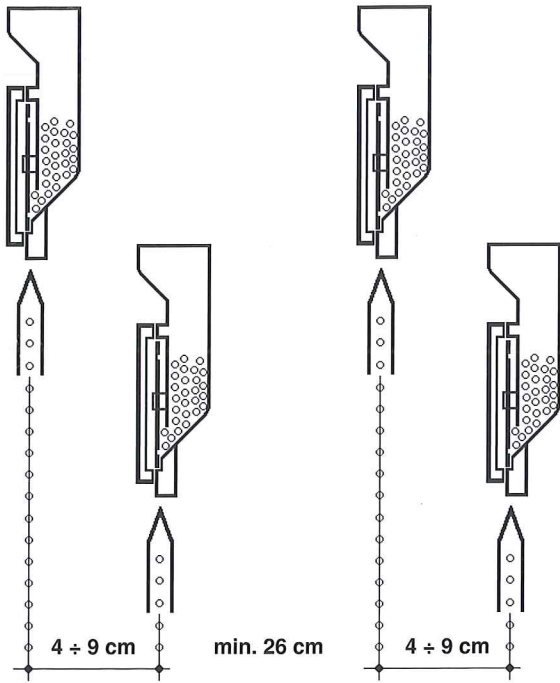

MOD. OLIMPIA

STANDARD PLANTING UNIT:

- (A) Seed plate
- (B) Press wheels

- 1) Seed distributor
- 2) Shoes
- 3) Pressure adjust. spring
- 4) Unit hooking lever
- 5a) Flexible rubber press wheel
- 5b) Hard rubber press wheel
- 5c) Stainless steel press wheel
- 5d) Cage steel press wheel
- 5e) Rubber "V" press wheel
- 6) Planting depth adjust. lever
- 7a) Seed stainless press wheel
- 7b) Seed rubber press wheel
- 8) Seed coverer

The new OLIMPIA seed drill has been designed to house 2 distributors like the ones installed on the ORIETTA model. The seeds are planted in 2 rows per element. The distributors can move sideways to cover 4 to 9 cm inter-rows.

The minimum distance between rows is 7 cm with the seed press wheel.
