Spraydome CDA (Adjustable)

Featuring extendable wings, the Spraydome CDA range has been specifically designed for treating weeds growing between rows of trees. As such, the sprayers are highly suitable for use in almonds, pistachios, walnuts and other tree crops.

Spraydome 1524 CDA

Capable of treating up to 2.4m widths (3.6m when fitted with Undavina 600 CDA extensions), Spraydome 1524 CDA offers an economical and effective centre-row weed control. As well as orchards, the machine is highly popular for controlling weeds in vineyards and amenity situations such as roadsides, parks and fence lines.

- Shielded CDA spray heads allow for more efficient use of chemicals
- Minimal spray drift, even on windy days
- Less down time through filling and calibrating
- Universal fittings for most ATVs and tractors
- Adjustable spray width between 1.5 and 2.4 metres
- Can be fitted with any Spraydome or Undavina series circular sprayer

Spraydome 3049 CDA

- Adjustable spray width of 3.0m to 4.9m
- Tree line to tree line - up to 7.2 metres spray width
- Spray 8 hectares in 1.9 hours with 200 litre tank
- Effective weed control at only 25 litres per hectare
- Minimised spray drift
