

SOLEX

3-Pt Dusters

DTS-250

Three-point mount
with 500 lb hopper

TEYME
TECNOLOGIA AGRICOLA, S.L.

The Solex DTS Duster by Teyme is a three-point mount design for efficient low-maintenance powder application.

It features a conical gravity-feed polyethylene hopper. This hopper has a large opening with double-vented screw-on lid that makes fillups easy. A vibrating agitator prevents material from bridging in hopper, ensuring that dust will flow smoothly.

The DTS has dual 15" centrifugal fans which deliver high velocity airflow -- 8475 cubic feet per minute -- for excellent coverage.

Rate adjustment is achieved via a simple lever control that provides 8 different levels of application and allows each side to be independently regulated. This allows you to apply dosages from 0 to 0.5 cubic feet per minute.

The DTS receives pto power through an oil-bathed gearbox that has a 1:7 gear ratio.

DTS Fan

Two Fans
Provide 8475
cubic feet of
airvolume for
superior coverage.

Capacity	Outlets	Fan	Gear Ratio	Agitation	Dosage	HP	Adjustment
500 lbs.	Two Universal Type	Dual 15" Centrifugal	1:7	Vibration Agitator	0 to 180 lbs/acre	16	8 settings Each Side Independently Adjustable

Optional 10 Outlet Row Crop Boom Kit:

Provides 5 rows of coverage, with 2 outlets for each row
