

422141 VOMERE DUAL 12 GOLD CON SCASSI INTERNO L=12

The runner above is a new runner available for the Dual 12 Gold, and is intended for very small plant plugs only. It is NOT recommended that this runner be promoted as a "standard" runner as it has the same high wear characteristics as the early Dual 12 runners. The standard runner, #421586, should still be recommended in all normal situations.
