# INTRODUCTION

Your Snowblower was carefully designed and we are confident it will meet your requirements in terms of quality, performance and reliability.

This manual was prepared to assist you in the safe operation of your new Snowblower. It contains important information which will help you achieve excellent returns with your Snowblower.

Please read this manual completely before operating your Snowblower and keep it for future reference.

Before starting the machine, you or any other person who will be operating the Snowblower must familiarize yourself with the safety recommendations and the operating instructions. Please read carefully and be sure to understand and follow all recommendations and procedures.

In this manual, the right and left sides are identified as shown on Figure 1.

If you require additional information on your Snowblower, please contact your TENCO Dealer.

**NOW** take a moment to enter the model, serial number and the date of purchase of your Snowblower in the space provided.

When ordering parts from your Dealer, please refer to these numbers for a fast and efficient service. Use TENCO parts for replacement.

The model and serial numbers are on the name plate shown on Fig. 1.

# **SAFETY**

## **GENERAL SAFETY**

### **WHEN YOU SEE THIS SYMBOL**

**ATTENTION!**

### **BE ALERT YOUR SAFETY IS INVOLVED**

This symbol «**SAFETY ALERT**» is used in this manual and on the safety decals on the Snowblower. It warns you of the possibility of danger. Carefully read, understand and follow all safety recommendations before operating the Snowblower.

- 1) Careful operation is the best assurance against accidents. Carefully read this manual and follow all recommendations before operating your Snowblower. It is the owner's responsibility to make sure that anyone who will operate the Snowblower will read this manual before operating the equipment.
- 2) Familiarize yourself with all controls and always be ready to stop the Snowblower quickly in case of emergency.
- 3) Never let a child operate the Snowblower.
- 4) Do not modify the Snowblower. Any non authorized modification may affect the efficiency and/or safety of the equipment.
- 5) Never operate the Snowblower with defective parts or if damaged in any way. Have it repaired before operating.
- 6) Make sure all fasteners are in place and properly secured or tightened. Refer to torque chart on page 23.
- 7) Avoid wearing loose fitting clothing when working with the Snowblower. These could get entangled in moving parts of the equipment and cause accidents.

- 8) Prolonged exposure to noise may hamper hearing. Protect yourself by wearing adequate protection devices.
- 9) Hydraulic fluids under pressure can damage your skin. Do not use your hands to locate a leak.
- 10) Before the beginning of the snow season, inspect all areas where the Snowblower will be used and remove any object which may cause an accident and/or damage the equipment.
- 11) Never operate your Snowblower in poor visibility or without proper lighting conditions.

## **SAFETY IN OPERATION**

- 1) Never raise the snowblower more than 5' to avoid tilting tractor forward.
- 2) Be sure there are no obstructions around the equipment and that no one stands near the equipment when in operation.
- 3) Do not operate an engine in a confined or non ventilated area.
- 4) Do not perform any adjustments, cleaning, maintenance or repairs with the engine running. The engine must be stopped and the P.T.O. disengaged. Preferably remove the key from the ignition.
- 5) Wear adequate clothing when working in cold or windy conditions.
- 6) Before starting-up the Snowblower, make sure the auger and drum areas are free of ice.
- 7) Place control handle in neutral position before starting engine.
- 8) Keep hands, feet and clothing away from moving parts of the Snowblower. Stay away from the discharge chute.
- 9) Before unplugging the chute, always disengage the P.T.O., stop the engine and relieve all hydraulic pressures.

---

---

## ***SAFETY (cont'd)***

---

- 10) Do not operate in excessive inclined conditions. Be careful when turning in slopes.
- 11) Never operate your Snowblower with missing guards or without protective devices in place.
- 12) Do not operate your Snowblower near buildings, windows or other vehicles without prior and proper adjustment of the chute deflector.
- 13) Never aim discharge chute towards people or animals. This may cause serious injuries.
- 14) Always reduce operating speed in slippery conditions.
- 15) Be careful when backing-up, make sure you have good visibility.
- 16) Always be on the lookout for objects which may enter the Snowblower.
- 17) If undue vibrations are felt, disengage the oil motor., stop the motor and look for the cause of the vibration. Vibration is usually the indication of a problem.
- 18) At the end of the operation, disengage the oil motor, lower the Snowblower, put transmission in neutral, apply parking brake, stop engine and remove the key from the ignition.

## ***SAFETY WITH MAINTENANCE***

- 1) Perform the Snowblower maintenance according to recommendations contained in this manual.
- 2) Stop engine and relieve all hydraulic pressures before doing inspection, maintenance or repairs.
- 3) Never perform any work under the Snowblower while it is supported only by the tractor's hydraulic system. It must be completely supported by wooden blocks or other safe means.

## ***SAFETY IN TRANSPORT***

- 1) On public roads, use proper safety lights and check local regulations.
- 2) Be alert while driving on the road. Never carry passengers.
- 3) Always disengage the oil motor while moving from one area of work to another.
- 4) Never exceed the speed that permits full steering and braking control at all times.
- 5) Be careful while backing up, make sure you have good visibility.

## ***SAFETY IN STORAGE***

- 1) Provide adequate supports to prevent any accidental overturning of the Snowblower.
- 2) Do not let children play in the area where the Snowblower is stored.

# **DECALS**

## **SAFETY DECALS**

The safety decals are affixed wherever special safety precautions are indicated. Locate them on the machine and read them carefully. If a decal is damaged, lost or illegible, install a new one. Each decal is shown and identified with a part number.

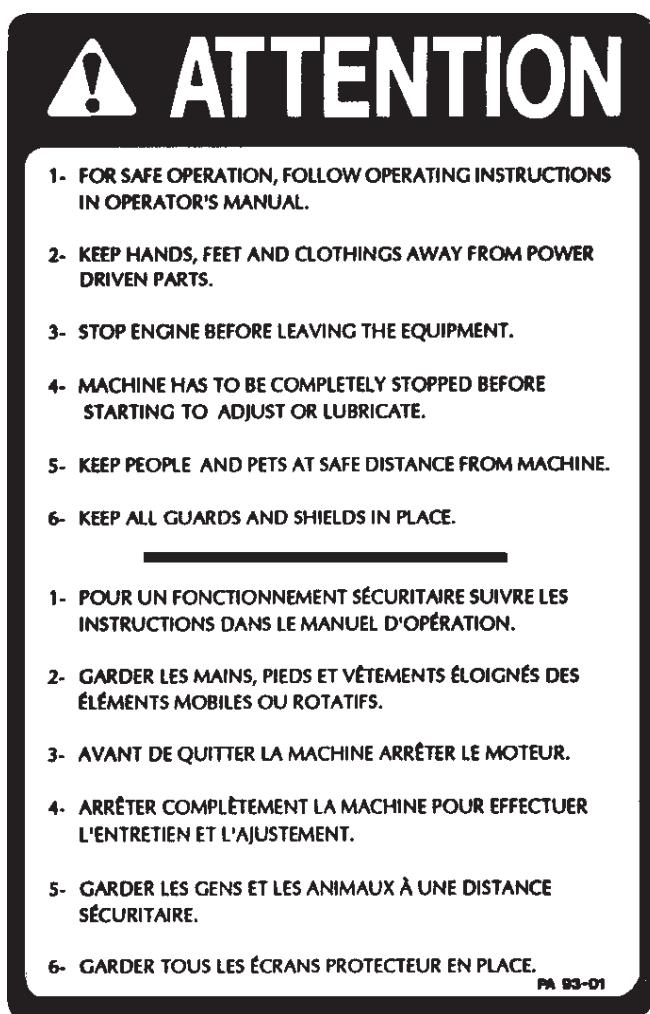

Figure 2  
Part no.: A102

Figure 3  
Part no.: A101

## **MAINTENANCE DECALS**

The maintenance decals indicate the points requiring lubrication. Refer to maintenance section for more details.

Figure 4  
Part no.: A104

Figure 5  
Part no.: A 106

---

---

## **MAINTENANCE**

---

- 1) Wipe off all grease fittings with a clean cloth before adding grease in order to avoid injecting dirt and sand.
- 2) Repair or replace damaged grease fittings.
- 3) Lubricate all grease fittings every 10 hours of operation.
- 4) Oil drive chain every 8 hours of operation.
- 5) Check oil level in gear box once a month. If necessary add oil.
- 6) Check tension of drive chain every 25 hours of operation and adjust if necessary.
- 7) Check for tightness of bearing collars every 50 hours of operation.
- 8) Change gearbox oil once a year. Use gear box oil S.A.E. W90 rated API, class GL-5.
- 9) Check all nuts and bolts once a year. If necessary use torque chart on page 23.

---

---

## ***STORAGE***

---

- 1) Store the Snowblower in a cool, dry place.
- 2) Support the Snowblower with wooden blocks.
- 3) Keep all piston rods in the retracted position. This will assure better protection against the elements.
- 4) Clean your Snowblower.
- 5) Thoroughly inspect all parts of the Snowblower. Replace or repair worn or defective parts.
- 6) Touch-up or repaint if necessary.
- 7) Lubricate all points before storage.

---

## **SNOWBLOWER SPECIFICATIONS**

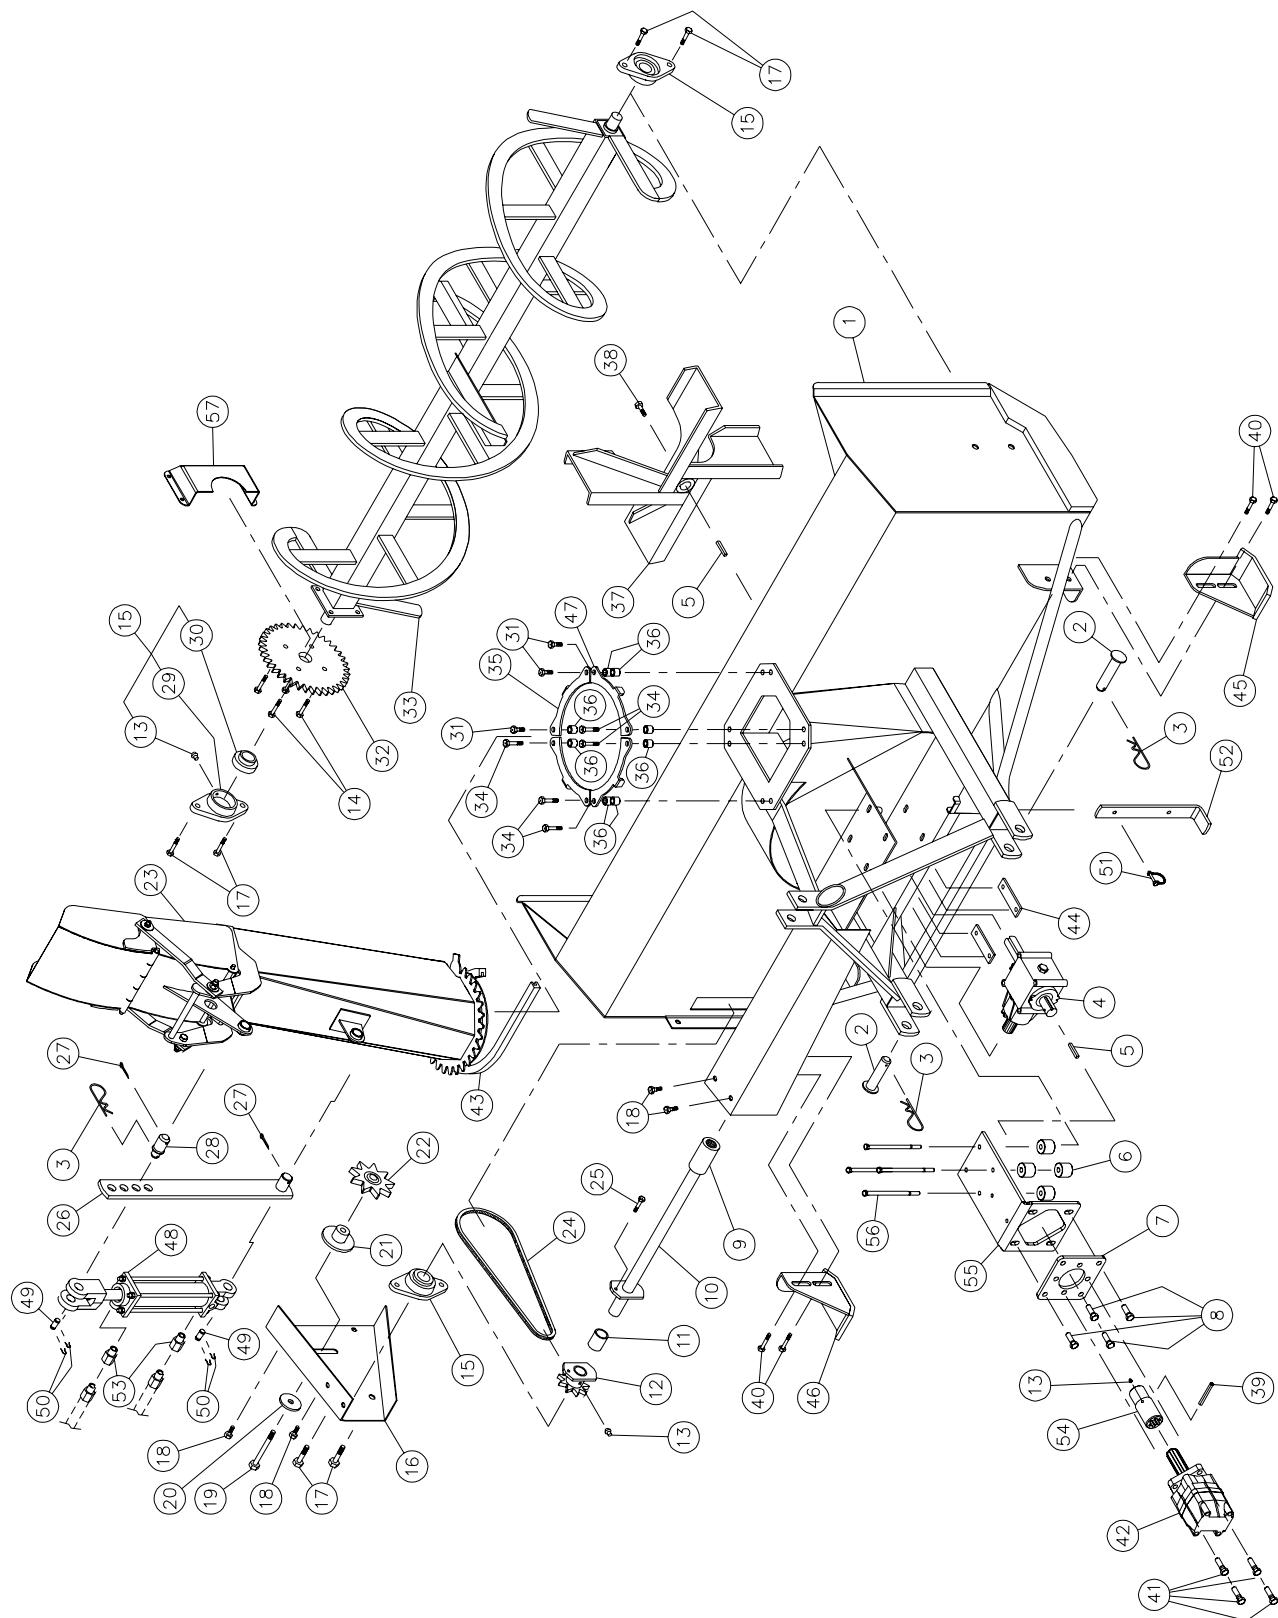

---

<b>MODEL</b>	<b>48T</b>	<b>54T</b>
Horse power recommended	15 to 20 GPM at 2500 psi (approx. 15 to 19 HP)	
Drive motor	MLHS100	
Working width	48"	54"
Cutting height	24½"	
Impeller diameter	20"	
Depth of drum	6"	
Impeller blades	4	
Size of impeller shaft	1"	
Impeller RPM	540	
Main auger diameter	16"	
Drive chain	50	
Hitch category	1	
Chute rotation on UHMW	Standard	
Adjustable skid shoes	Standard	
Manual chute rotation kit opt.	<b>MD-4872</b>	
Hyd. cyl. chute rotation kit opt.	<b>HRD-4872</b>	
Hyd. motor chute rotation kit opt.	<b>HMD-4872</b>	
Cylinder for hyd. chute rotation opt.	<b>25TR04</b>	
Motor for hyd. chute rotation opt.	<b>MLH-125</b>	
Cylinder for deflector hyd. control opt.	<b>25TR04</b>	
App. weight	385 lbs	392 lbs

Use the above torques when special torque is not given.

NOTE: These values apply to fasteners as received from supplier, dry, or when lubricated with normal engine oil. They do not apply if extreme pressure lubricants are used.

## **WARRANTY**

---

TENCO warrants this product to the initial purchaser for the period of one year from the date of purchase against defects in materials and workmanship.

We will replace or repair defective parts free of charge if they are returned to our plant in St-Valérien-de-Milton, Quebec, Canada.

Transportation charges are the responsibility of the customer. This warranty is not transferable.

Hydraulic cylinders are covered by the manufacturer of these items.

All TENCO spare parts purchased are covered by a three (3) month warranty.

This warranty becomes void and null if the equipment is modified, breaks down as the result of an accident, is not operated according to manufacturer's recommendations, damaged by negligence or if maintenance has not been carried out as specified.

Our obligation is limited to the replacement or repair of the defective part. TENCO accepts no responsibility for direct or indirect consequential damages of any kind.
